

CitiusTech: CQ-IQ (Analytics Web Services Platform)

ONC Certified HIT

CQ-IQ allows healthcare organizations to accelerate their clinical quality reporting and analytics capabilities. It leverages the BI-Clinical Rules Engine to provide CQM computation capabilities (as a web service) in a HIPAA compliant cloud environment.

In a fast-changing healthcare landscape, clinical quality measures (CQMs) are becoming increasingly important to healthcare organizations. Reporting on CQMs is a core requirement of the ONC Meaningful Use guidelines, and is driving the performance and quality improvement initiatives across payers, providers and employers.

CQ-IQ: Overview

CQ-IQ is a comprehensive analytics platform that leverages the power of BI-Clinical, CitiusTech's healthcare BI and analytics platform. CQ-IQ currently covers more than 250 pre-built clinical quality measures, relevant across various care settings such as physician practices, hospitals, ACOs and health plans.

Healthcare organizations can use CQ-IQ to participate in various federal incentive programs, commercial payer initiatives and provider quality programs. CQ-IQ provides an industrial strength clinical quality measure solution and is backed by CitiusTech's commitment to keep CQM definitions current with changing industry requirements.

Key Highlights

- Simple web services-based mechanism to run CQMs, integrated with existing applications (e.g. care management solutions, EHRs, data warehouses and big data solutions)
- Easy-to-use testing and data validation tools for data structure, data quality and terminology compliance
- Ability to align measures and reporting period with internal processes and workflows
- Strong ROI with pay-as-you-go model
- ONC-HIT 2014 certified (V15.9, 11122015-3110-8) for Meaningful Use clinical quality measures*
- Key supported regulatory measures - Meaningful Use, ACO-33, HEDIS, PQRS, etc.

CQ-IQ: Cloud-hosted Clinical Quality Analytics Platform

CQ-IQ: Powered by BI-Clinical

CQ-IQ leverages BI-Clinical Rules Engine for clinical, financial, operational and regulatory reporting. BI-Clinical, CitiusTech's proprietary healthcare BI and analytics platform, has been deployed across 4,500 provider locations. BI-Clinical covers over 600 KPIs and performance measures and is a highly configurable solution for quality reporting. Drawing from the inherent CQM capabilities of BI-Clinical, CQ-IQ supports a wide range of regulatory measures including Meaningful Use, ACO, HEDIS, VBP, PQRS, etc.
